

A transformer on 23<sup>rd</sup> Street exploded early in the morning of July 10<sup>th</sup>, 2018. Fortunately, no one was hurt and no fire was started. Everyone in this neighborhood has been aware for many months that this transformer was sparking and not safe. Had this occurred with a transformer closer to trees, the potential fire risk could have been substantial. The City needs to be much more aggressive with its undergrounding efforts. If this issue is important to you, please let City Council know! Oh, and by the way, these power lines are also hideous to look at.
